Salary Analysis

05

Conclusions

01 ✨ Buisness Overview ✨

Overview

Next Gen Corp is a rapidly growing technology company that specializes in creating cutting edge hardware and software solutions. In order to ensure expansion, the organization takes pride in luring top talents across the globe, and upholding excellent employee satisfaction.

Problem Statement

There are growing concerns about employee turnover, salary disparities and performance variability within departments.

Solutions?

- Analyse employee turnover trends and identify root causes of high turnover rates
- Analyse employee performance across different departments and identify areas where performance can be improved
- Analyse salary distribution and ensure fair compensation on performance and departmental benchmarks.

02 Employee Retention Analysis

1. Who are the top 5 highest serving employees?

Query Query History

```
-- 1 Who are the top 5 highest serving employees/  
SELECT employee_id, concat(first_name, ' ', last_name) AS fullname, hire_date,  
       CURRENT_DATE - hire_date AS days_served  
FROM employee  
ORDER BY hire_date ASC  
LIMIT 5;
```

Data Output Messages Notifications

Showing rows: 1 to 5

	employee_id [PK] integer	fullname text	hire_date date	days_served integer
1	8	David Moore	2015-06-30	3679
2	48	Frank Smith	2015-09-08	3609
3	67	Jane Brown	2015-10-12	3575
4	44	John Johnson	2015-10-27	3560
5	57	John Doe	2016-02-16	3448

Insights

Findings

- Top 5 employees are David Moore, Frank Smith, Jane Brown, John Johnson, and John Doe.
- All top 5 employees have been employed for over 9 years, with David Moore as the longest serving employee at 10 years.
- Majority of long staying employees were hired between 2015 and 2016

Actionable recommendations

- Conduct comprehensive stay interviews to determine key drivers for loyalty to replicate across the organisation
- Analyse the 2015-2016 hiring process
- Continuous monitoring of top staying employees.

2. What is the turnover rate for each department?

Query Query History

```
8
9  -- 2. WHAT IS THE TURNOVER RATE FOR EACH DEPARTMENT?
10 SELECT d.department_name, ROUND(CAST(COUNT(t.turnover_id) AS DECIMAL) /
11 COUNT(e.employee_id) * 100, 2) AS turnover_rate
12 FROM department d
13 JOIN employee e ON d.department_id = e.department_id
14 LEFT JOIN turnover t ON e.employee_id = t.employee_id
15 GROUP BY d.department_name
16 ORDER BY turnover_rate DESC;
17
18
```

Data Output Messages Notifications

	department_name character varying (30)	turnover_rate numeric
1	Marketing	92.86
2	Engineering	66.67
3	Sales	27.59
4	HR	27.27

Insights

Findings

- Marketing (92.86%) and Engineering (66.67%) have alarmingly high turnover rates, indicating severe underlying problems.
- Stark contrast between high turnover departments and stable ones (Sales, 27.59% and HR, 27.27%), suggesting localized issues
- Marketing's turnover is nearly 1.5x Engineering's and 3x Sales/HR.

Actionable Recommendations

- Deep-dive root cause analysis i.e conduct exit/stay interviews and surveys, etc
- Targeted retention strategies in low turnover departments i.e career pathing, competitive compensation, improved work-life balance and recognition programs
- Best practise transfer; Cross departmental workshops, mentorship programs and policy review from Sale/HR

3. Which employees are at risk of leaving based on their performance?

Insights

Query

Query History

```
--3. WHICH EMPLOYEES ARE AT RISK OF LEAVING BASED ON THEIR PERFORMANCE?
SELECT
  e.employee_id,
  CONCAT(e.first_name, ' ', e.last_name) AS full_name,
  d.department_name,
  COUNT(p.performance_id) AS total_reviews,
  ROUND(AVG(p.performance_score), 2) AS avg_perf_score,
  CASE
    WHEN AVG(p.performance_score) <= 3.0 THEN 'High Risk'
    WHEN AVG(p.performance_score) <= 3.5 THEN 'Moderate Risk'
    ELSE 'Low Risk'
  END AS risk_level
FROM employee e
JOIN performance p ON p.employee_id = e.employee_id
JOIN department d ON e.department_id = d.department_id
GROUP BY e.employee_id, full_name, d.department_name
HAVING AVG(p.performance_score) <= 3.5
ORDER BY avg_perf_score;
```

Data Output

Messages

Notifications

SQL

Showing rows: 1 to 1

Page No:

	employee_id integer	full_name text	department_name character varying (30)	total_reviews bigint	avg_perf_score numeric	risk_level text
1	22	Grace Wilson	Sales	6	3.43	Moderate Risk

Findings

- Grace Wilson in Sales is the only employee with a moderate risk of leaving the company.
- She has an average performance score of 3.43

Actionable recommendations

- Managerial check-in
- Performance improvement plans (PIP)
- Focused mentorship plans

4. What are the main reasons employees are leaving the company?

The screenshot shows a database query interface with a SQL editor and a results table. The query is as follows:

```
-- 4. WHAT ARE THE MAIN REASONS EMPLOYEES ARE LEAVING THE COMPANY?
SELECT
  t.reason_for_leaving,
  COUNT(*) AS number_of_exits,
  ROUND(COUNT(*) * 100.0 / SUM(COUNT(*)) OVER (), 2) AS percentage_of_total
FROM turnover t
JOIN employee e ON t.employee_id = e.employee_id
GROUP BY t.reason_for_leaving
ORDER BY number_of_exits DESC;
```

The results table displays the following data:

	reason_for_leaving text	number_of_exits bigint	percentage_of_total_exits numeric
1	Personal	11	39.29
2	Found Another Job	7	25.00
3	Career Growth	5	17.86
4	Retired	5	17.86

Insights

Findings

- ‘Personal’ reasons accounts for the largest proportion of exits (39.29%).
- ‘Found another Job’ (25%) highlights external market influence and company competitiveness in talent retention.
- ‘Career growth’ (17.86%) indicates potential gaps in internal advancement opportunities

Actionable Recommendations

- Deep-dive into ‘Personal’ reasons for leaving, by conducting enhanced exit interviews
- Provide regular compensation/benefits review, career development opportunities and recognition programs
- Conduct regular pulse surveys, HR analytics dashboards and manager training on retention
- Cultivate a positive work environment

03

**Performance
Analysis**

1. How many employees have left the company?

The screenshot shows a SQL query editor with a query history pane on the left. The query is as follows:

```
--PERFORMANCE ANALYSIS
--1.HOW MANY EMPLOYEES HAVE LEFT THE COMPANY?
Select count(*) as employees_left
from turnover;
```

Below the query editor, the 'Data Output' pane shows the results of the query. The results are displayed in a table with one row and one column.

employees_left bigint
28

Insights

Findings

- **28 out of 60 employees have left the company**

Actionable Recommendations

- Root cause analysis i.e conduct exit/stay interviews and surveys, etc
- Targeted retention strategies in low turnover departments i.e career pathing, competitive compensation, improved work-life balance and recognition programs
- Conduct comprehensive stay interviews to determine key drivers for loyalty to replicate across the organisation

2. How many employees have a performance score of 5.0/ below 3.5?

The screenshot shows a PostgreSQL query editor interface. The query is as follows:

```
--2. How many employees have a performance score of 5.0 / below 3.5?

SELECT
  COUNT(CASE WHEN performance_score = 5.0 THEN 1 END) AS employees_with_score_5_0,
  COUNT(CASE WHEN performance_score < 3.5 THEN 1 END) AS employees_with_score_below_3_5
FROM
  performance;
```

The results are displayed in a table with two columns: `employees_with_score_5_0` and `employees_with_score_below_3_5`. The first row shows the counts for each category.

	employees_with_score_5_0	employees_with_score_below_3_5
1	9	71

Insights

Findings

- Total of 7 employees have a performance score of 5.0
- Total of 71 employees with score below 3.5

Actionable Recommendations

- The number of employees with a perfect score (5.0) can highlight top performers who may be candidates for promotion, special projects, or recognition programs.
- The number of employees with a low score (below 3.5) signals potential issues that need to be addressed. This could point to the need for targeted training, performance improvement plans, or further investigation into underlying challenges they might be facing.

3. Which department has the most employees with a performance of 5.0/ below 3.5?

Query	Query History
178	
179	
180	--3. WHICH DEPARTMENT HAS THE MOST EMPLOYEES WITH A PERFORMANCE OF 5.0 / BELOW 3.5?
181	SELECT
182	d.department_name,
183	COUNT(DISTINCT CASE WHEN p.performance_score = 5.0 THEN e.employee_id END)
184	AS top_performer_count,
185	COUNT(DISTINCT CASE WHEN p.performance_score = 3.5 THEN e.employee_id END)
186	AS mid_performer_count
187	FROM performance p
188	JOIN employee e ON p.employee_id = e.employee_id
189	JOIN department d ON e.department_id = d.department_id
190	WHERE p.performance_score IN (3.5, 5.0)
191	GROUP BY d.department_name
192	ORDER BY top_performer_count DESC;
193	
194	

Data Output	Messages	Notifications
Showing rows: 1 to 4 Page No: 1		
department_name	top_performer_count	mid_performer_count
character varying (30)	bigint	bigint
1 Sales	6	6
2 Marketing	2	0
3 HR	1	0
4 Engineering	0	1

Insights

Findings

- Sales department has the highest number of employees scoring 5.0 at 6, and lowest number of employees below 3.5, also at 6
- Marketing has 2 employees scoring 5.0, followed by HR with 1 employee
- Most departments have no or few mid performers, implying a generally high-performing organization

Actionable Recommendations

- Conduct detailed employee interviews to determine the root cause of high mid performers in sales department
- Immediate intervention is needed on employees in the sales department with mid performance score
- Conduct regular performance data reviews, in order to generate early warning systems and provide management training on early intervention

4. What is the average performance score by department?

Query	Query History
95	
96	
97	--4. WHAT IS THE AVERAGE PERFORMANCE SCORE BY DEPARTMENT?
98	SELECT d.department_name, ROUND(AVG(p.performance_score), 2)
99	AS avg_perf_score
100	FROM employee e
101	JOIN performance p ON e.employee_id = p.employee_id
102	JOIN department d ON e.department_id = d.department_id
103	GROUP BY d.department_name
104	ORDER BY avg_perf_score DESC;
105	
106	
107	

Data Output	Messages	Notifications
Showing rows		
	department_name character varying (30)	avg_perf_score numeric
1	Marketing	4.17
2	HR	4.11
3	Sales	4.07
4	Engineering	4.01

Insights

Findings

- All departments show high average performance scores indicating a generally high-performing workforce
- Marketing has the highest average score (4.17), setting a benchmark for excellence
- Engineering has the lowest score (4.01), suggesting areas for targeted support
- There is very small difference in performance range (4.01 to 4.17) across all 4 departments

Actionable Recommendations

- Sustain and leverage high performance from Marketing and HR through best practice sharing, leadership development and internal/ cross departmental benchmarking
- Conduct targeted performance enhancement through needs assessments, tailored skill development, performance coaching and resource optimization

04

Salary Analysis

1. What is the total salary expense for the company?

The screenshot shows a SQL query editor with a query history tab. The query is as follows:

```
105
106
107
108 --SALARY ANALYSIS
109 --1. WHAT IS THE TOTAL SALARY EXPENSE FOR THE COMPANY?
110 SELECT COUNT(employee_id)
111 AS no_of_employees, TO_CHAR(SUM(salary_amount):: numeric, 'FM$999,999,999.0
112 AS total_salary_expense
113 FROM salary;
114
115
116
```

Below the query editor, the 'Data Output' tab is active, showing the results of the query. The results are displayed in a table with two columns: 'no_of_employees' (bigint) and 'total_salary_expense' (text). The table shows one row of data:

	no_of_employees bigint	total_salary_expense text
1	60	\$4,850,000.00

Insights

Finding s

- Total annual salary expense of \$4,850,000 for 60 employees represents a substantial investment
- Average salary per employee of \$80,833.33 suggests a competitive compensation level

Actionable Recommendations

- Perform a detailed breakdown of sales compensation, career pathing, and their alignment with business goals
- Perform a comprehensive compensation review on marketing specialists
- Establish compensation bands and framework (eg. job grading)

2. What is the average salary by job title?

Query Query History

```
114
115
116
117 --2. WHAT IS THE AVERAGE SALARY BY JOB TITLE?
118 SELECT e.job_title, ROUND(AVG(s.salary_amount), 2)
119 AS avg_salary
120 FROM employee e
121 LEFT JOIN salary s ON s.employee_id = e.employee_id
122 GROUP BY job_title
123 ORDER BY avg_salary DESC;
124
125
126
```

Data Output Messages Notifications

Showing

	job_title character varying (30)	avg_salary numeric
1	Sales Representative	84285.71
2	HR Specialist	81818.18
3	Engineer	80000.00
4	Sales Manager	80000.00
5	Marketing Specialist	77857.14

Insights

Finding s

- Sales related roles (Sales reps and managers) have the highest average salaries
- Sales reps have higher average salary than sales managers
- HR specialists have the second highest average salary (81,818)
- Marketing Specialists have the lowest average salary(77,857)
- Engineers and sales managers have identical average salary (80,000)

Actionable Recommendations

- Perform a detailed breakdown of sales compensation, career pathing, and their alignment with business goals
- Perform a comprehensive compensation review on marketing specialists
- Establish compensation bands and framework (eg. job grading)

3. How many employees earn above 80,000?

Query Query History

```
125
126
127
128 --3. HOW MANY EMPLOYEES EARN ABOVE 80,000?
129 SELECT COUNT(DISTINCT s.employee_id) AS total_high_earners
130 FROM salary s
131 WHERE s.salary_amount > 80000;
132
133
134
135
136
```

Data Output Messages Notifications

		Showing results
total_high_earners		
bigint		
1	26	

Insights

Finding s

- 26 employees (43.3%) earn above \$80,000 annually
- This indicates a substantial investment in higher compensated roles

Actionable Recommendations

- Develop higher earning growth opportunities for all employees

41 --4. How does performance correlate with salary across department

[Data Output](#) [Messages](#) [Notifications](#)

	department_name character varying (30)	average_performance_score numeric	average_salary numeric
1	Engineering	4.0111111111111111	80000.000000000000
2	HR	4.1136363636363636	81818.181818181818
3	Marketing	4.1654761904761905	77857.142857142857
4	Sales	4.0660919540229885	82068.965517241379

- **Engineering:** This department has an average performance score of approximately 4.01 and an average salary of \$80,000.
- **.HR:** This department has a slightly higher average performance score of approximately 4.11 and an average salary of \$81,818.18.
- **Marketing:** This department has the highest average performance score at approximately 4.17 but a lower average salary compared to HR, at \$77,857.14.
- **Sales:** This department has the lowest average performance score at approximately 4.07 (note: the image shows 4.066, but the next digit is a 9, rounding up to 4.07) but the highest average salary at \$82,068.96.

- **Conduct a salary audit and implement a performance-based bonus structure to retain top talent.**
- **Conduct a salary audit and implement a performance-based bonus structure to retain top talent.**
- **Implement a proactive retention strategy by conducting one-on-one reviews with high-performers to ensure their compensation and growth opportunities are meeting their expectations.**
- **Establish a transparent compensation framework that clearly links performance to salary and promotions.**

05

Conclusions

KEY INSIGHTS

- There is a substantial human capital investment with total annual salary expenses of \$4,850,000 for 60 employees
- 43.3% of employees earn above 80,000 while 56.7% earn below, requiring equitable compensation policies
- Marketing shows a negative correlation (-0.07) between performance and salary, contributing to high turnover (92.86)
- Engineering has the strongest (though generally weak) positive correlation (0.21), offering a model-for-pay performance
- Sales related roles have the highest average salary

ACTIONABLE RECOMMENDATIONS FOR HR?

- Conduct comprehensive exit/stay surveys/interviews to evaluate leadership, resources and compensation
- Strengthen pay-for performance alignment and compensation equity across all department especially marketing
- Create clear career paths, while implementing targeted retention initiatives
- Foster a positive work environment and improve work life balance
- Build HR analytics platforms/dashboards to conduct regular monitoring and audits of compensation packages
